I transitioned from Mathematics Education to pursue my passion for software and technology. After completing computer programming studies, I now work primarily as a Frontend Developer. I maintain a commitment to continuous learning, regularly exploring new technologies and working on personal projects to strengthen my practical skills.

EXPERIENCE

MLPCARE – Software Specialist

Jan 2026 - Current

I support the sustainability of applications used by personnel within İstinye University, Medical Park Hospital Group, and Liv Hospital. I contribute to the development of software services needed by various user groups, from management level to consulting units. I enhance user experience by integrating artificial intelligence-supported features into existing projects and develop solutions that improve operational efficiency.

Tech: Next.js, React, Redux, Zustand, TypeScript, react-hook-form, zod,, Azure,, Tailwind CSS, LLM

PozitifTech – Frontend Developer

Dec 2023 - Sep 2025

At PozitifTech, I gained valuable exposure to various aspects of the banking sector and developed practical expertise in financial technology solutions.

- On the Payfix project, I worked on modules for international money transfers, E-Pin purchases, IP-based security systems, open banking integrations, and payment gateway solutions for e-commerce platforms. During the redesign phase, we completely rebuilt the user interface with modern technologies to enhance user experience. We prioritized responsive design, performance optimization, and accessibility standards to improve user satisfaction.
- For the CashFix Backoffice project, I contributed to developing an internal management panel that streamlines financial transaction operations using Next.js and TypeScript. I also built the CashFix corporate website, creating a fast and responsive platform that effectively represents the company's corporate identity.

Tech: Next.js, React, Redux, Zustand, TypeScript, react-hook-form, zod,, Azure, Material Joy, Tailwind CSS

Venhancer – Software Developer

Aug 2022 - Dec 2023

- Out Source: Edenred Turkey
 - For the Edenred Turkey project, we implemented UI and responsive design improvements that resulted in a 30% increase in website usage. I developed a screen structure that enables meal card top-ups through Excel file data imports.
- Out Source: Fibabanka
 - The Fibabanka project provided me with hands-on experience in React Native Web technology. I gained valuable insights into banking processes and played a key role in establishing the credit lending system between car dealership owners and customers.

- Out Source: MTEK Bilişim
 - On the MTEK Bilişim project, I worked on a major football league application where I contributed to UI design and workflow processes while implementing a caching mechanism to enhance code quality and performance. I was responsible for ensuring responsive UI across various platforms for current and future projects.
- Out Source: Anadolu Sigorta
 - For the Anadolu Sigorta project, I served as the sole frontend developer, determining and implementing the entire project structure from the ground up. As part of the network team, I participated in UI design, responsive design implementation, and business flow development based on their requirements.
- IT Support - Help Desk
 - In my IT Support role, I managed internal services including identifying new service providers, procuring employee devices, configuring email setups, and resolving technical issues. This position required close collaboration with procurement, service providers, accounting, and sales departments.

Tech: ReactJS, Redux, React Native Web, TypeScript, Azure, Ant Design, Vite, useQuery, Keycloak

Imtek Engineering – Frontend Developer

Sep 2021 - Jun 2022

- I supported the company's international marketing initiatives by building new websites and optimizing their SEO performance for global reach. I designed and implemented high-performing React and TypeScript web applications with a focus on optimizing page load speeds.

Tech: ReactJS, TypeScript, EverGreenUI

DigitalAct – Frontend Developer

Mar 2021 - Sep 2021

- I learned and applied Javascript and React technologies in project development, creating features based on customer feedback. On the Admin Theme project, I built the entire structure from scratch through to deployment. During this period, I learned and implemented CSS3, Sass/Less, and Ant Design as CSS frameworks.

Tech: ReactJS, Redux, Swagger, HTML, CSS, Ant Design

LANGUAGES

Turkish - Native
English - A2

EDUCATION

Anadolu University, Eskişehir Turkey – Management Information Systems

2023 - Current

My commitment to continuous learning and adopting emerging technologies enables me to deliver innovative solutions that drive value for organizations and teams.

Istanbul Aydin University, Istanbul Turkey – Computer Programming

2019 - 2021

I bring strong problem-solving, crisis management, and analytical capabilities to frontend development. As a collaborative team player, I focus on creating user-friendly interfaces that make a meaningful impact. My dedication to continuous learning and technological advancement positions me to contribute innovative solutions and play a significant role in driving team and organizational success.

INTERESTS AND ACTIVITIES

Interests: Cinema, Table Tennis, Video Game, Video Creating

Activities: During my free time, I enjoy playing table tennis with my friends and exploring new places to discover unique flavors. Additionally, I run a YouTube Channel where my friend and I review and critique movies.
